Experience

Full Stack Developer — Evolve Mechanical Services

August 2025-2026
Contract

Australia

- Designed and developed a modern, responsive website for Evolve Mechanical Services, establishing a professional digital presence for the Australian mechanical services business.
- Built service and location-focused pages to clearly showcase the company's capabilities and improve discoverability across Melbourne and surrounding service areas.
- Developed a performance-focused frontend with responsive layouts, optimized assets, accessible UI, and SEO-friendly page structure.
- Implemented SEO best practices, including semantic HTML, metadata, structured content, and optimized page architecture to improve search visibility.
- Collaborated directly with the client to translate business requirements into intuitive user experiences and conversion-focused website content.

Mid Frontend Engineer — Scale Forge

Singapore

July 2025-2026

Fulltime

- Built and maintained production-grade frontend applications using Next.js, Svelte, and TypeScript for high-traffic web platforms.
- Engineered and scaled a reusable component library/design system, improving consistency, maintainability, and developer productivity across multiple products.
- Drove Core Web Vitals improvements through bundle optimization, lazy loading, code splitting, image optimization, and rendering performance enhancements.
- Integrated REST and GraphQL APIs, implementing efficient data-fetching, caching, and state management to deliver responsive and reliable user experiences.

Full Stack Developer — Kairose

Human Destiny Venture

Canada

March 2025

3 Months Contract

- Developed reusable cross-platform components for web and mobile applications, improving consistency and maintainability.
- Implemented Stripe payment integration, enabling secure and seamless payment processing.
- Contributed to the development of the company's cross-platform mobile application, delivering key features for the initial release.
- Integrated OpenAI APIs to provide AI-powered chat functionality within the application.
- Enhanced application performance, responsiveness, and stability across client-facing web and mobile platforms.

Full Stack Developer — Fligno Software

Philippines

Feb 2022-2025

Fulltime

- Delivered scalable web and mobile applications for local and international clients, translating business requirements into production-ready solutions.
- Developed and maintained frontend and backend features using modern JavaScript and PHP technologies, ensuring high performance and maintainable code.
- Designed and implemented RESTful APIs, database schemas, and business workflows to support scalable and efficient application architecture.
- Mentored junior developers and interns through code reviews, technical guidance, and knowledge sharing while collaborating with cross-functional teams to deliver high-quality software.

Full Stack Developer — Oasis Dental Call Center
California

September 2023
2 months Contract

- Developed and maintained the company's marketing website and CMS, enabling efficient content management and streamlined publishing workflows.
- Built responsive, SEO-optimized landing pages that improved search visibility and user engagement.
- Enhanced frontend performance, accessibility, and cross-device responsiveness to deliver a consistent user experience.

Full Stack Developer — Nibble Team
Australia

August 2023
4 months Contract

- Led the frontend architecture and project structure, delivering intuitive, scalable, and user-friendly web applications.
- Managed the development and maintenance of two web applications, consistently delivering features on schedule and meeting project objectives.
- Designed user-centered interfaces by contributing to both UI and UX design, improving usability, visual consistency, and overall user experience.

Selected Projects

Rentaro (Personal SaaS)

- End-to-end rental SaaS platform including booking engine, marketplace, CRM, analytics, and multi-tenant architecture.

Opexa (Scaleforge SaaS)

- Contributed to a SaaS platform for casino operators, developing operational dashboards, management tools, and scalable frontend components for internal business operations.

The Matrix of Destiny (Kairose Human Destiny Venture)

- Enhanced the platform by integrating OpenAI-powered AI features, modernizing payment workflows, and improving cross-platform performance, stability, and user experience.

Green Life Clinics (Fligno)

- Led the backend development for the Patient Portal and Warehouse Management System, architecting core APIs and integrating a third-party POS to synchronize patient, inventory, and order workflows. Developed a secure PWA supporting appointments, treatment plans, medical records, and real-time warehouse operations.

Education

Phinma Cagayan de Oro
BS Information Technology
